### **Power Maths calculation policy, Reception**

The following pages show the *Power Maths* progression in calculation (addition, subtraction, multiplication and division). The consistent use of the CPA (concrete, pictorial, abstract) approach across *Power Maths* helps children develop mastery across all the operations in an efficient and reliable way. In Reception, children focus on concrete and pictorial representations. At this stage, children focus on representing objects in different ways e.g. understanding that 5 cars can also be represented as 5 counters, 5 cubes, 5 pictures of cars, etc.

In Reception, children are encouraged to record their findings in their own way. This may include writing number sentences e.g.  $3 + 4 = 7$ , however this is not a requirement until Year 1.

**Power Maths calculation policy Reception**

Children develop the core ideas that underpin all calculation. They begin by connecting calculation with counting on and counting back, but they should learn that understanding wholes and parts will enable them to calculate efficiently and accurately, and with greater flexibility. Children record their calculations in their own ways, there is no expectation of number sentences at this stage, however children may choose this way to record their thinking.

Key language: count, forwards, backwards, whole, part, recombine, break apart, ones, ten, tens, number bond, add, adding together, addition, plus, total, altogether, first, then, now, subtract, subtraction, find the difference, take away, minus, left, less, more, fewer, group, share, equal, equals, is equal to, groups, equal groups, divide, share, shared equally

**Addition:**

Children start to explore addition by sorting groups. They then use sorting to develop their understanding of parts and wholes.

Children combine groups to find the whole, using a part-whole model to support their thinking. They also use the part-whole model to find number bonds within and to 10.

Using a five frame and ten frame, children add by counting on. They start by finding one more before adding larger numbers using counters or cubes on the frames.

Children use a number track to add by counting on. Linking this learning to playing board games is an effective way to support children's addition.

**Subtraction:**

Children start to explore subtraction by sorting groups. They use sorting to develop their understanding of parts and wholes.

When comparing groups, children use the language more than and fewer than. This will lead to finding the difference when they move into KS1.

Children then connect subtraction with the idea of counting back and finding one less using a five frame to support their thinking.

They explore subtraction by breaking apart a whole to find a missing part. This links to their developing recall of number bonds.

Children count back within 20 using number tracks and ten frames to see the effect of taking away.

**Multiplication and Division:**

Children first start to look at the idea of equal groups through their exploration of doubles. They use five frames and objects to check that groups are equal.

Children then explore halving numbers by making two equal groups. They highlight patterns between doubling and halving seeing that double 2 is 4 and half of 4 is 2.

As well as halving, children also explore sharing into more than two equal groups. They share objects one by one, ensuring that each group has an equal share.

Reception

	Real-life representation	Other representations
<p><b>Addition</b></p>	<p><b>Counting and adding more (within 5)</b></p> <p>Children add one more person or object to a group to find one more.</p> <div style="display: flex; justify-content: space-around; align-items: center;">   </div> <p>One more than 3 is 4.</p>	<p><b>Counting and adding more (within 5)</b></p> <p>Children represent first, then, now stories on a five frame. They make the first number and then add one more.</p> <p><b>First</b></p> <div style="display: flex; justify-content: space-around;">  </div> <p><b>Then</b></p> <div style="display: flex; justify-content: space-around;">  </div> <p><b>Now</b></p> <div style="display: flex; justify-content: space-around;">  </div> <p>First, there are 3 bikes. Then, 1 more bike came. Now, there are 4 bikes.</p>

**Combining groups to find the whole**

Children sort people and objects into parts and combine them to find the whole.

*The parts are 3 and 4. The whole is 7.*

**Combining groups to find the whole**

Children use counters or cubes in a part-whole model to find the whole.

*The parts are 3 and 4. The whole is 7.*

### Finding number bonds to 10

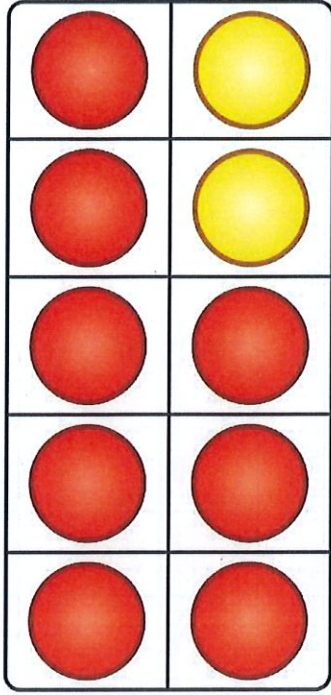

Children combine two groups to find a number bond to 10.

*There are 8 bottles on the wall.  
There are 2 bottles on the floor.  
There are 10 bottles altogether.*

### Finding number bonds to 10

Use ten frames and part-whole models to represent key number bonds.

*8 and 2 is 10.  
There are 10 altogether.*

*6 and 4 is 10.  
There are 10 altogether.*

**Adding by counting on (number track)**

Children jump along a physical number track. They start at the larger number and count on the smaller number to find the total.

**Adding by counting on (number track)**

Children use a number track and a counter. They start at the larger number and count on the smaller number to find the total.

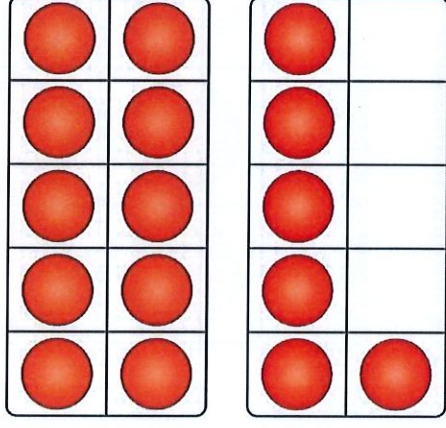

**Adding by counting on (ten frames)**

Children find the total number by counting on from the larger number.

**Adding by counting on (ten frames)**

Children make the larger number on the ten frames and then make the smaller number, counting on to find the total. They can use counters, cubes or other objects on the ten frames.

**Sorting groups (optional)**

Children sort everyday objects into groups.

### Subtraction

Children line up objects to compare the amount. They line the objects up either horizontally or vertically.

*Ella has more conkers.  
Tom has fewer conkers.*

### Comparing groups

Children line up cubes or counters to compare the amount in each group. Lines can either be horizontal or vertical. A starting line helps to line the objects accurately.

*There are more yellow cubes.  
There are fewer red cubes.*

**Counting back and taking away (within 5)**

Children remove one more person or object from a group to find one less.

First, there were 3 children.  
Then, 1 child left.  
Now, there are 2 children.

**Counting back and taking away (within 5)**

Children use five frames and objects to make a number. They then remove or cross out one object to find one less.

One less than 3 is 2.

**Introducing the part-whole model**

Children sort everyday objects into parts.

One part is the 

The other part is the 

**Introducing the part-whole model**

Children use counters or cubes to represent objects in a part-whole model.

The whole is 5.

2 is a part.

3 is a part.

**Finding number bonds to 10**

Children partition 10 into different groups to find the number bonds to 10.

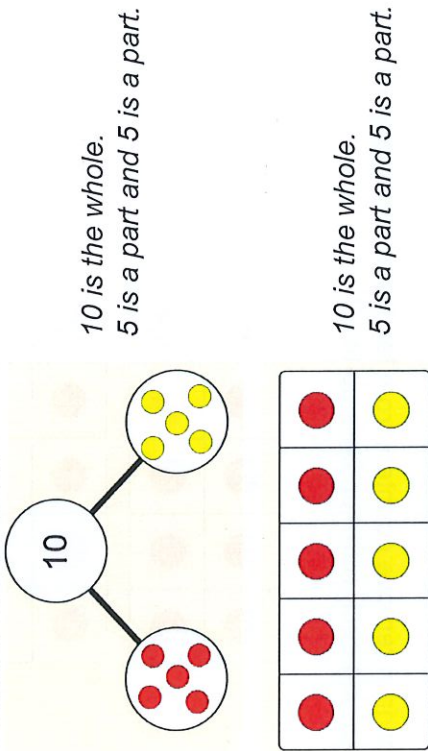

Children begin to work with subtraction number bonds. They break apart 10 to identify different number bonds to 10.

10 are bouncing.  
2 get off.  
8 are left.  
 $10 - 2 = 8$

**Finding number bonds to 10**

Children use part-whole models, ten frames and counters to find the number bonds to 10.

10 is the whole.  
5 is a part and 5 is a part.

10 is the whole.  
5 is a part and 5 is a part.

Children use part-whole models, and counters to find missing parts and the subtraction number bonds to 10.

The parts are 8 and 2.  
10 is the whole.

	<p><b>Counting back and taking away (number track)</b></p> <p>Children use game boards and human number tracks to subtract by counting back.</p>  <p>9 take away 3 equals 6 9...8...7...6</p>	<p><b>Counting back and taking away (number track)</b></p> <p>Children use a number track and a counter. They start at the larger number and count back the smaller number to find the answer.</p>  <p>9 take away 3 equals 6 9...8...7...6</p>
	<p><b>Counting back and taking away (ten frames)</b></p> <p>Children count backwards to find one less with numbers up to 20.</p>  <p>One less than 16 is 15.</p>	<p><b>Counting back and taking away (ten frames)</b></p> <p>Children remove counters from ten frames to support in counting back with numbers up to 20.</p>  <p>One less than 16 is 15.</p>

	<p><b>Sorting groups (optional)</b></p> <p>Children sort everyday objects into groups.</p> 	
<p><b>Multiplication</b></p>	<p><b>Making doubles</b></p> <p>Children explore doubles in their environment including in games such as on dominoes or dice. They focus on the understanding of doubles being 2 equal groups.</p>  <p><i>Double 4 is 8.</i> <i>Double 2 is 4.</i> <i>Double 3 is 6.</i></p>	<p><b>Making doubles</b></p> <p>Children use five frames to find doubles by lining up counters or cubes.</p>  <p><i>Double 4 is 8.</i></p>

**Division**

**Halving and sharing**

Children explore halving and sharing through practical sharing using real life scenarios including sharing fruit or classroom equipment.

Half of 8 is 4.

**Halving and sharing**

Children use five frames to share amounts fairly and to check that the groups are equal. They share the counters/cubes one by one.

Half of 6 is 3.

**Vocabulary**

Count, forwards, backwards, whole, part, recombine, break apart, ones, ten, tens, number bond, add, adding together, addition, plus, total, altogether, first, then, now, subtract, subtraction, find the difference, take away, minus, left, less, more, fewer, group, share, equal, equals, is equal to, groups, equal groups, divide, share, shared equally

### **Power Maths calculation policy, KS1**

The following pages show the *Power Maths* progression in calculation (addition, subtraction, multiplication and division) and how this works in line with the National Curriculum. The consistent use of the CPA (concrete, pictorial, abstract) approach across *Power Maths* helps children develop mastery across all the operations in an efficient and reliable way. This policy shows how these methods develop children's confidence in their understanding of both written and mental methods.

KEY STAGE 1

Children develop the core ideas that underpin all calculation. They begin by connecting calculation with counting on and counting back, but they should learn that understanding wholes and parts will enable them to calculate efficiently and accurately, and with greater flexibility. They learn how to use an understanding of 10s and 1s to develop their calculation strategies, especially in addition and subtraction.

**Key language:** whole, part, ones, ten, tens, number bond, add, addition, plus, total, altogether, subtract, subtraction, find the difference, take away, minus, less, more, group, share, equal, equals, is equal to, groups, equal groups, times, multiply, multiplied by, divide, share, shared equally, times-table

**Addition and subtraction:** Children first learn to connect addition and subtraction with counting, but they soon develop two very important skills: an understanding of parts and wholes, and an understanding of unitising 10s, to develop efficient and effective calculation strategies based on known number bonds and an increasing awareness of place value. Addition and subtraction are taught in a way that is interlinked to highlight the link between the two operations. A key idea is that children will select methods and approaches based on their number sense. For example, in Year 1, when faced with  $15 - 3$  and  $15 - 13$ , they will adapt their ways of approaching the calculation appropriately. The teaching should always emphasise the importance of mathematical thinking to ensure accuracy and flexibility of approach, and the importance of using known number facts to harness their recall of bonds within 20 to support both addition and subtraction methods. In Year 2, they will start to see calculations presented in a column format, although this is not expected to be formalised until KS2. We show the column method in Year 2 as an option; teachers may not wish to include it until Year 3.

**Multiplication and division:** Children develop an awareness of equal groups and link this with counting in equal steps, starting with 2s, 5s and 10s. In Year 2, they learn to connect the language of equal groups with the mathematical symbols for multiplication and division. They learn how multiplication and division can be related to repeated addition and repeated subtraction to find the answer to the calculation. In this key stage, it is vital that children explore and experience a variety of strong images and manipulative representations of equal groups, including concrete experiences as well as abstract calculations. Children begin to recall some key multiplication facts, including doubles, and an understanding of the 2, 5 and 10 times-tables and how they are related to counting.

**Fractions:** In Year 1, children encounter halves and quarters, and link this with their understanding of sharing. They experience key spatial representations of these fractions, and learn to recognise examples and non-examples, based on their awareness of equal parts of a whole. In Year 2, they develop an awareness of unit fractions and experience non-unit fractions, and they learn to write them and read them in the common format of numerator and denominator.

Year 1

	Concrete	Pictorial	Abstract
<p><b>Year 1 Addition</b></p>	<p><b>Counting and adding more</b> Children add one more person or object to a group to find one more.</p> 	<p><b>Counting and adding more</b> Children add one more cube or counter to a group to represent one more.</p>  <p><i>One more than 4 is 5.</i></p>	<p><b>Counting and adding more</b> Use a number line to understand how to link counting on with finding one more.</p>  <p><i>One more than 6 is 7. 7 is one more than 6.</i></p> <p>Learn to link counting on with adding more than one.</p>  <p><math>5 + 3 = 8</math></p>
	<p><b>Understanding part-part-whole relationship</b> Sort people and objects into parts and understand the relationship with the whole.</p>  <p><i>The parts are 2 and 4. The whole is 6.</i></p>	<p><b>Understanding part-part-whole relationship</b> Children draw to represent the parts and understand the relationship with the whole.</p>  <p><i>The parts are 1 and 5. The whole is 6.</i></p>	<p><b>Understanding part-part-whole relationship</b> Use a part-whole model to represent the numbers.</p>  <p><math>6 + 4 = 10</math></p> <p><math>6 + 4 = 10</math></p>

<p><b>Knowing and finding number bonds within 10</b> Break apart a group and put back together to find and form number bonds.</p>  <p><math>3 + 4 = 7</math></p>  <p><math>6 = 2 + 4</math></p>	<p><b>Knowing and finding number bonds within 10</b> Use five and ten frames to represent key number bonds.</p>  <p><math>5 = 4 + 1</math></p>  <p><math>10 = 7 + 3</math></p>	<p><b>Knowing and finding number bonds within 10</b> Use a part-whole model alongside other representations to find number bonds. Make sure to include examples where one of the parts is zero.</p> <p>a)</p>  <p>b)</p>  <p><math>4 + 0 = 4</math> <math>3 + 1 = 4</math></p>
<p><b>Understanding teen numbers as a complete 10 and some more</b> Complete a group of 10 objects and count more.</p>  <p><math>13</math> is 10 and 3 more.</p>	<p><b>Understanding teen numbers as a complete 10 and some more</b> Use a ten frame to support understanding of a complete 10 for teen numbers.</p>  <p><math>13</math> is 10 and 3 more.</p>	<p><b>Understanding teen numbers as a complete 10 and some more.</b> <i>1 ten and 3 ones equal 13.</i> <math>10 + 3 = 13</math></p>

<p><b>Adding by counting on</b> Children use knowledge of counting to 20 to find a total by counting on using people or objects.</p> 	<p><b>Adding by counting on</b> Children use counters to support and represent their counting on strategy.</p> 	<p><b>Adding by counting on</b> Children use number lines or number tracks to support their counting on strategy.</p> 
<p><b>Adding the 1s</b> Children use bead strings to recognise how to add the 1s to find the total efficiently.</p>  <p><math>2 + 3 = 5</math> <math>12 + 3 = 15</math></p>	<p><b>Adding the 1s</b> Children represent calculations using ten frames to add a teen and 1s.</p>  <p><math>2 + 3 = 5</math> <math>12 + 3 = 15</math></p>	<p><b>Adding the 1s</b> Children recognise that a teen is made from a 10 and some 1s and use their knowledge of addition within 10 to work efficiently.</p> <p><math>3 + 5 = 8</math> So, <math>13 + 5 = 18</math></p>
<p><b>Bridging the 10 using number bonds</b> Children use a bead string to complete a 10 and understand how this relates to the addition.</p>  <p><math>7 \text{ add } 3 \text{ makes } 10.</math> So, <math>7 \text{ add } 5 \text{ is } 10 \text{ and } 2 \text{ more.}</math></p>	<p><b>Bridging the 10 using number bonds</b> Children use counters to complete a ten frame and understand how they can add using knowledge of number bonds to 10.</p> 	<p><b>Bridging the 10 using number bonds</b> Use a part-whole model and a number line to support the calculation.</p>  <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><u>Vocabulary</u></p> <p>add, more, plus, and, make, altogether, total, equal to, equals, double, most, count on, number line</p> </div>

<p><b>Year 1 Subtraction</b></p>	<p><b>Counting back and taking away</b> Children arrange objects and remove to find how many are left.</p>  <p>1 less than 6 is 5. 6 subtract 1 is 5.</p>	<p><b>Counting back and taking away</b> Children draw and cross out or use counters to represent objects from a problem.</p>  <p><math>9 - \square = \square</math> There are <math>\square</math> children left.</p>	<p><b>Counting back and taking away</b> Children count back to take away and use a number line or number track to support the method.</p>  <p><math>9 - 3 = 6</math></p>
<p><b>Finding a missing part, given a whole and a part</b> Children separate a whole into parts and understand how one part can be found by subtraction.</p>  <p><math>8 - 5 = ?</math></p>	<p><b>Finding a missing part, given a whole and a part</b> Children represent a whole and a part and understand how to find the missing part by subtraction.</p>  <p><math>5 - 4 = \square</math></p>	<p><b>Finding a missing part, given a whole and a part</b> Children use a part-whole model to support the subtraction to find a missing part.</p>  <p><math>7 - 3 = ?</math></p> <p>Children develop an understanding of the relationship between addition and subtraction facts in a part-whole model.</p>  <p><math>\square - \square = \square</math> <math>\square - \square = \square</math> <math>\square + \square = \square</math> <math>\square + \square = \square</math></p>	<p><b>Finding a missing part, given a whole and a part</b> Children use a part-whole model to support the subtraction to find a missing part.</p> <p>Children develop an understanding of the relationship between addition and subtraction facts in a part-whole model.</p>

<p><b>Finding the difference</b> Arrange two groups so that the difference between the groups can be worked out.</p>  <p>8 is 2 more than 6. 6 is 2 less than 8. The difference between 8 and 6 is 2.</p>	<p><b>Finding the difference</b> Represent objects using sketches or counters to support finding the difference.</p>  <p><math>5 - 4 = 1</math> The difference between 5 and 4 is 1.</p>	<p><b>Finding the difference</b> Children understand 'find the difference' as subtraction.</p>  <p><math>10 - 4 = 6</math> The difference between 10 and 4 is 6.</p>
<p><b>Subtraction within 20</b> Understand when and how to subtract 1s efficiently.</p> <p>Use a bead string to subtract 1s efficiently.</p>  <p><math>5 - 3 = 2</math> <math>15 - 3 = 12</math></p>	<p><b>Subtraction within 20</b> Understand when and how to subtract 1s efficiently.</p>  <p><math>5 - 3 = 2</math> <math>15 - 3 = 12</math></p>	<p><b>Subtraction within 20</b> Understand how to use knowledge of bonds within 10 to subtract efficiently.</p> <p><math>5 - 3 = 2</math> <math>15 - 3 = 12</math></p>
<p><b>Subtracting 10s and 1s</b> For example: <math>18 - 12</math></p> <p>Subtract 12 by first subtracting the 10, then the remaining 2.</p>  <p>First subtract the 10, then take away 2.</p>	<p><b>Subtracting 10s and 1s</b> For example: <math>18 - 12</math></p> <p>Use ten frames to represent the efficient method of subtracting 12.</p>  <p>First subtract the 10, then subtract 2.</p>	<p><b>Subtracting 10s and 1s</b> Use a part-whole model to support the calculation.</p>  <p><math>19 - 14</math> <math>19 - 10 = 9</math> <math>9 - 4 = 5</math> So, <math>19 - 14 = 5</math></p>

	<p><b>Subtraction bridging 10 using number bonds</b> For example: <math>12 - 7</math></p> <p>Arrange objects into a 10 and some 1s, then decide on how to split the 7 into parts.</p> <p><i>7 is 2 and 5, so I take away the 2 and then the 5.</i></p>	<p><b>Subtraction bridging 10 using number bonds</b> Represent the use of bonds using ten frames.</p> <p><i>For <math>13 - 5</math>, I take away 3 to make 10, then take away 2 to make 8.</i></p>	<p><b>Subtraction bridging 10 using number bonds</b> Use a number line and a part-whole model to support the method.</p> <p><math>13 - 5</math></p> <p><b>Vocabulary</b> equal to, take, take away, less, minus, subtract, leaves, distance between, difference between, how many more, how many fewer / less than, most, least, count back, how many left, how much less is ?, count on</p>
<p><b>Year 1 Multiplication</b></p>	<p><b>Recognising and making equal groups</b> Children arrange objects in equal and unequal groups and understand how to recognise whether they are equal.</p>	<p><b>Recognising and making equal groups</b> Children draw and represent equal and unequal groups.</p>	<p><b>Describe equal groups using words</b> <i>Three equal groups of 4.</i> <i>Four equal groups of 3.</i></p>
	<p><b>Finding the total of equal groups by counting in 2s, 5s and 10s</b></p>	<p><b>Finding the total of equal groups by counting in 2s, 5s and 10s</b></p>	<p><b>Finding the total of equal groups by counting in 2s, 5s and 10s</b></p>

There are 5 pens in each pack ...  
 5...10...15...20...25...30...35...40...

100 squares and ten frames support counting in 2s, 5s and 10s.

Use a number line to support repeated addition through counting in 2s, 5s and 10s.

**Vocabulary**

groups of, lots of, times, array, altogether,

**Year 1 Division**

**Grouping**  
 Learn to make equal groups from a whole and find how many equal groups of a certain size can be made.

Sort a whole set people and objects into equal groups.

*There are 10 children altogether.  
 There are 2 in each group.  
 There are 5 groups.*

**Sharing**

Share a set of objects into equal parts and work out how many are in each part.

**Grouping**  
 Represent a whole and work out how many equal groups.

*There are 10 in total.  
 There are 5 in each group.  
 There are 2 groups.*

**Sharing**

Sketch or draw to represent sharing into equal parts. This may be related to fractions.

**Grouping**

Children may relate this to counting back in steps of 2, 5 or 10.

**Sharing**

*10 shared into 2 equal groups gives 5 in each group.*

**Vocabulary**

share, share equally, one each, two each..., group, groups of, lots of, array

**Adding a 1-digit number to a 2-digit number not bridging a 10**

Add the 1s to find the total. Use known bonds within 10.

41 is 4 tens and 1 one.  
41 add 6 ones is 4 tens and 7 ones.

This can also be done in a place value grid.

T	O

Add the 1s.

34 is 3 tens and 4 ones.  
4 ones and 5 ones are 9 ones.  
The total is 3 tens and 9 ones.

T	O

Add the 1s.

Understand the link between counting on and using known number facts. Children should be encouraged to use known number bonds to improve efficiency and accuracy.

This can be represented horizontally or vertically.

$$34 + 5 = 39$$

or

T	O
3	4
+	5
	9

Add the 1s to find the total. Use known bonds within 10.

41 is 4 tens and 1 one.  
41 add 6 ones is 4 tens and 7 ones.

This can also be done in a place value grid.

T	O

Add the 1s.

34 is 3 tens and 4 ones.  
4 ones and 5 ones are 9 ones.  
The total is 3 tens and 9 ones.

T	O

Add the 1s.

Understand the link between counting on and using known number facts. Children should be encouraged to use known number bonds to improve efficiency and accuracy.

This can be represented horizontally or vertically.

$$34 + 5 = 39$$

or

T	O
3	4
+	5

+	5
	9

**Adding a 1-digit number to a 2-digit number bridging 10**

Complete a 10 using number bonds.

There are 4 tens and 5 ones.  
I need to add 7. I will use 5 to complete a 10, then add 2 more.

Complete a 10 using number bonds.

Complete a 10 using number bonds.

$$7 = 5 + 2$$

$$45 + 5 + 2 = 52$$

<p><b>Adding a 1-digit number to a 2-digit number using number exchange</b></p>	<p>Exchange 10 ones for 1 ten.</p>	<p>Exchange 10 ones for 1 ten.</p>	<p>Exchange 10 ones for 1 ten.</p>
<p><b>Adding a multiple of 10 to a 2-digit number</b></p>	<p>Add the 10s and then recombine.</p> <p>27 is 2 tens and 7 ones. 50 is 5 tens.</p> <p>There are 7 tens in total and 7 ones. So, 27 + 50 is 7 tens and 7 ones.</p>	<p>Add the 10s and then recombine.</p> <p>66 is 6 tens and 6 ones. 66 + 10 = 76</p> <p>A 100 square can support this understanding.</p>	<p>Add the 10s and then recombine.</p> $37 + 20 = ?$ $30 + 20 = 50$ $50 + 7 = 57$ $37 + 20 = 57$

**Adding a multiple of 10 to a 2-digit number using columns**

Add the 10s using a place value grid to support.

16 is 1 ten and 6 ones.  
30 is 3 tens.  
There are 4 tens and 6 ones in total.

Add the 10s using a place value grid to support.

16 is 1 ten and 6 ones.  
30 is 3 tens.  
There are 4 tens and 6 ones in total.

Add the 10s represented vertically. Children must understand how the method relates to unitising of 10s and place value.

1 + 3 = 4  
1 ten + 3 tens = 4 tens  
16 + 30 = 46

**Adding two 2-digit numbers**

Add the 10s and 1s separately.

5 + 3 = 8  
There are 8 ones in total.  
3 + 2 = 5  
There are 5 tens in total.  
35 + 23 = 58

Add the 10s and 1s separately. Use a part-whole model to support.

32 + 11 = 43  
11 = 10 + 1  
32 + 10 = 42  
42 + 1 = 43  
32 + 11 = 43

Add the 10s and the 1s separately, bridging 10s where required. A number line can support the calculations.

17 + 25

<p><b>Adding two 2-digit numbers using a place value grid</b></p>	<p>Add the 1s. Then add the 10s.</p>		<p>Add the 1s. Then add the 10s.</p>
<p><b>Adding two 2-digit numbers with exchange</b></p>	<p>Add the 1s. Exchange 10 ones for a ten. Then add the 10s.</p>		<p>Add the 1s. Exchange 10 ones for a ten. Then add the 10s.</p>

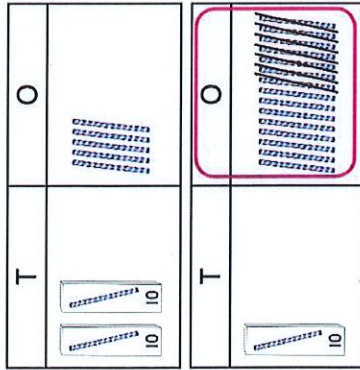

**Vocabulary**  
 add, more, plus, and, make, altogether, total, equal to, equals, double, most, count on, number line, digit, sum, tens, units, partition, addition, column, tens boundary, exchange, inverse

<p><b>Year 2 Subtraction</b></p>	<p>Use known number bonds and unitising to subtract multiples of 10.</p>  <p>7 tens subtract 5 tens is 2 tens. 70 - 50 = 20</p>	<p>Use known number bonds and unitising to subtract multiples of 10.</p>  <p>10 - 3 = 7 So, 10 tens subtract 3 tens is 7 tens.</p>	<p>Use known number bonds and unitising to subtract multiples of 10.</p>  <p>7 tens subtract 5 tens is 2 tens. 70 - 50 = 20</p>
<p><b>Subtracting a single-digit number</b></p>	<p>Subtract the 1s. This may be done in or out of a place value grid.</p>  <p>8 subtract 6 is 2. So, 8 tens subtract 6 tens is 2 tens.</p>	<p>Subtract the 1s. This may be done in or out of a place value grid.</p>  <p>10 - 3 = 7 So, 10 tens subtract 3 tens is 7 tens.</p>	<p>Subtract the 1s. Understand the link between counting back and subtracting the 1s using known bonds.</p>  <p>39 - 3 = 36</p>
<p><b>Subtracting a single-digit number bridging 10</b></p>	<p>Bridge 10 by using known bonds.</p>  <p>35 - 6 I took away 5 counters, then 1 more.</p>	<p>Bridge 10 by using known bonds.</p>  <p>35 - 6 First, I will subtract 5, then 1.</p>	<p>Bridge 10 by using known bonds.</p>  <p>24 - 6 = ? 24 - 4 - 2 = ?</p>

**Subtracting a single-digit number using exchange**

Exchange 1 ten for 10 ones. This may be done in or out of a place value grid.

Exchange 1 ten for 10 ones.

Exchange 1 ten for 10 ones.

**Subtracting a 2-digit number**

Subtract by taking away.

$61 - 18$

I took away 1 ten and 8 ones.

Subtract the 10s and the 1s.

This can be represented on a 100 square.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

$25 - 7 = 18$

Subtract the 10s and the 1s.

This can be represented on a number line.

$64 - 41 = ?$

$64 - 1 = 63$

$63 - 40 = 23$

$64 - 41 = 23$

$46 - 20 = 26$

$26 - 5 = 21$

$46 - 25 = 21$

**Subtracting a 2-digit number using place value and columns**

Subtract the 1s. Then subtract the 10s. This may be done in or out of a place value grid.

$$38 - 16 = 22$$

Subtract the 1s. Then subtract the 10s.

Using column subtraction, subtract the 1s. Then subtract the 10s.

**Subtracting a 2-digit number with exchange**

Exchange 1 ten for 10 ones. Then subtract the 1s. Then subtract the 10s.

Using column subtraction, exchange 1 ten for 10 ones. Then subtract the 1s. Then subtract the 10s.

**Vocabulary**

- equal to, take, take away, less,
- minus, subtract, leaves,
- distance between, difference
- between, how many more, how many fewer / less than, most,
- least, count back, how many left, how much less is, count on, strategy, partition, tens, units, inverse

<p><b>Year 2 Multiplication</b></p>	<p>Recognise equal groups and write as repeated addition and as multiplication.</p>  <p>3 groups of 5 chairs 15 chairs altogether</p>	<p>Recognise equal groups using standard objects such as counters and write as repeated addition and multiplication.</p>  <p>3 groups of 5 15 in total</p>	<p>Use a number line and write as repeated addition and as multiplication.</p>  <p><math>5 + 5 + 5 = 15</math> <math>3 \times 5 = 15</math></p>
<p><b>Using arrays to represent multiplication and support understanding</b></p>	<p>Understand the relationship between arrays, multiplication and repeated addition.</p>  <p>4 groups of 5</p>	<p>Understand the relationship between arrays, multiplication and repeated addition.</p>  <p>4 groups of 5 ... 5 groups of 5</p>	<p>Understand the relationship between arrays, multiplication and repeated addition.</p>  <p><math>5 \times 5 = 25</math></p>
<p><b>Understanding commutativity</b></p>	<p>Use arrays to visualise commutativity.</p>  <p>I can see 6 groups of 3. I can see 3 groups of 6.</p>	<p>Form arrays using counters to visualise commutativity. Rotate the array to show that orientation does not change the multiplication.</p>  <p>This is 2 groups of 6 and also 6 groups of 2.</p>	<p>Use arrays to visualise commutativity.</p>  <p><math>4 + 4 + 4 + 4 + 4 = 20</math> <math>5 + 5 + 5 + 5 = 20</math> <math>4 \times 5 = 20</math> and <math>5 \times 4 = 20</math></p>

**Learning x2,  
x5 and x10  
table facts**

Develop an understanding of how to unitise groups of 2, 5 and 10 and learn corresponding times-table facts.

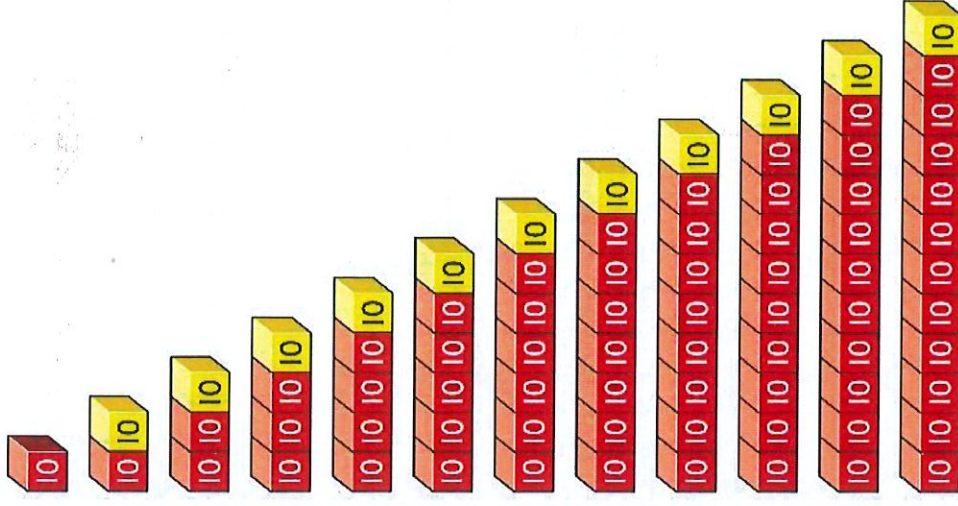

3 groups of 10 ... 10, 20, 30  
 $3 \times 10 = 30$

Understand how to relate counting in unitised groups and repeated addition with knowing key times-table facts.

$10 + 10 + 10 = 30$   
 $3 \times 10 = 30$

Understand how the times-tables increase and contain patterns.

$5 \times 10 = 50$   
 $6 \times 10 = 60$

			<p><b>Vocabulary</b></p> <p>groups of, lots of, times, array, altogether, multiply, count, multiplied by, repeated addition, column, row, sets of, equal groups, times as big as, once, twice, three</p>
<p><b>Year 2 Division</b></p>	<p><b>Sharing equally</b></p>	<p>Start with a whole and share into equal parts, one at a time.</p>  <p>12 shared equally between 2. They get 6 each.</p> <p>Start to understand how this also relates to grouping. To share equally between 3 people, take a group of 3 and give 1 to each person. Keep going until all the objects have been shared</p>	<p>Represent the objects shared into equal parts using a bar model.</p>  <p>20 shared into 5 equal parts. There are 4 in each part.</p>
		<p>Use a bar model to support understanding of the division.</p>  <p>18 ÷ 2 = 9</p>	

	<p>15 shared equally between 3. They get 5 each.</p>		
<p><b>Grouping equally</b></p>	<p>Understand how to make equal groups from a whole.</p> <p>8 divided into 4 equal groups. There are 2 in each group.</p>	<p>Understand the relationship between grouping and the division statements.</p> <p><math>12 \div 3 = 4</math></p> <p><math>12 \div 4 = 3</math></p> <p><math>12 \div 6 = 2</math></p> <p><math>12 \div 2 = 6</math></p>	<p>Understand how to relate division by grouping to repeated subtraction.</p> <p>There are 4 groups now.</p> <p>12 divided into groups of 3. <math>12 \div 3 = 4</math></p> <p>There are 4 groups.</p>
<p><b>Using known times-tables to solve divisions</b></p>	<p>Understand the relationship between multiplication facts and division.</p>	<p>Link equal grouping with repeated subtraction and known times-table facts to support division.</p>	<p>Relate times-table knowledge directly to division.</p>

4 groups of 5 cars is 20 cars in total.  
20 divided by 4 is 5.

40 divided by 4 is 10.

Use a bar model to support understanding of the link between times-table knowledge and division.

- 1 x 10 = 10
- 2 x 10 = 20
- 3 x 10 = 30
- 4 x 10 = 40
- 5 x 10 = 50
- 6 x 10 = 60
- 7 x 10 = 70
- 8 x 10 = 80

I used the 10 times-table to help me.  
3 x 10 = 30.

I know that 3 groups of 10 makes 30, so I know that 30 divided by 10 is 3.

3 x 10 = 30    so    30 ÷ 10 = 3

Vocabulary

share, share equally, one each, two each..., group, groups of, lots of, array, divide, divided by, divided into, division, grouping, number line,

*Power Maths* calculation policy

St John Bosco RC Primary School

[www.st-johnbosco.manchester.sch.uk](http://www.st-johnbosco.manchester.sch.uk)

***Power Maths*** calculation policy, LOWER KS2

**KEY STAGE 2**

In Years 3 and 4, children develop the basis of written methods by building their skills alongside a deep understanding of place value. They should use known addition/subtraction and multiplication/division facts to calculate efficiently and accurately, rather than relying on counting. Children use place value equipment to support their understanding, but not as a substitute for thinking.

**Key language:** partition, place value, tens, hundreds, thousands, column method, whole, part, equal groups, sharing, grouping, bar model

**Addition and subtraction:** In Year 3 especially, the column methods are built up gradually. Children will develop their understanding of how each stage of the calculation, including any exchanges, relates to place value. The example calculations chosen to introduce the stages of each method may often be more suited to a mental method. However, the examples and the progression of the steps have been chosen to help children develop their fluency in the process, alongside a deep understanding of the concepts and the numbers involved, so that they can apply these skills accurately and efficiently to later calculations. The class should be encouraged to compare mental and written methods for specific calculations, and children should be encouraged at every stage to make choices about which methods to apply.

In Year 4, the steps are shown without such fine detail, although children should continue to build their understanding with a secure basis in place value. In subtraction, children will need to develop their understanding of exchange as they may need to exchange across one or two columns. By the end of Year 4, children should have developed fluency in column methods alongside a deep understanding, which will allow them to progress confidently in upper Key Stage 2.

**Multiplication and division:** Children build a solid grounding in times-tables, understanding the multiplication and division facts in tandem. As such, they should be as confident knowing that 35 divided by 7 is 5 as knowing that 5 times 7 is 35. Children develop key skills to support multiplication methods: unitising, commutativity, and how to use partitioning effectively. Unitising allows children to use known facts to multiply and divide multiples of 10 and 100 efficiently. Commutativity gives children flexibility in applying known facts to calculations and problem solving. An understanding of partitioning allows children to extend their skills to multiplying and dividing 2- and 3-digit numbers by a single digit.

Children develop column methods to support multiplications in these cases. For successful division, children will need to make choices about how to partition. For example, to divide 423 by 3, it is effective to partition 423 into 300, 120 and 3, as these can be divided by 3 using known facts.

Children will also need to understand the concept of remainder, in terms of a given calculation and in terms of the context of the problem.

**Fractions:** Children develop the key concept of equivalent fractions, and link this with multiplying and dividing the numerators and denominators, as well as exploring the visual concept through fractions of shapes. Children learn how to find a fraction of an amount, and develop this with the aid of a bar model and other representations alongside.

In Year 3, children develop an understanding of how to add and subtract fractions with the same denominator and find complements to the whole. This is developed alongside an understanding of fractions as numbers, including fractions greater than 1. In Year 4, children begin to work with fractions greater than 1.

Decimals are introduced, as tenths in Year 3 and then as hundredths in Year 4. Children develop an understanding of decimals in terms of the relationship with fractions, with dividing by 10 and 100, and also with place value.

Year 3

		Concrete	Pictorial	Abstract
<b>Year 3 Addition</b>				
<b>Understanding 100s</b>	<p>Understand the cardinality of 100, and the link with 10 tens.</p> <p>Use cubes to place into groups of 10 tens.</p>	<p>Unitise 100 and count in steps of 100.</p>	<p>Represent steps of 100 on a number line and a number track and count up to 1,000 and back to 0.</p>	
<b>Understanding place value to 1,000</b>	<p>Unitise 100s, 10s and 1s to build 3-digit numbers.</p>	<p>Use equipment to represent numbers to 1,000.</p>	<p>Represent the parts of numbers to 1,000 using a part-whole model.</p> <p>Recognise numbers to 1,000 represented on a number line, including those between intervals.</p>	

<p><b>Adding 100s</b></p>	<p>Use known facts and unitising to add multiples of 100.</p>  <p> <math>3 + 2 = 5</math>  <math>3 \text{ hundreds} + 2 \text{ hundreds} = 5 \text{ hundreds}</math>  <math>300 + 200 = 500</math> </p>	<p>Use known facts and unitising to add multiples of 100.</p>  <p> <math>3 + 4 = 7</math>  <math>3 \text{ hundreds} + 4 \text{ hundreds} = 7 \text{ hundreds}</math>  <math>300 + 400 = 700</math> </p>	<p>Use known facts and unitising to add multiples of 100.</p> <p>Represent the addition on a number line.</p> <p>Use a part-whole model to support unitising.</p>  <p> <math>3 + 2 = 5</math>  <math>300 + 200 = 500</math> </p>
<p><b>3-digit number + 1s, no exchange or bridging</b></p>	<p>Use number bonds to add the 1s.</p>  <p> <math>214 + 4 = ?</math>  <i>Now there are 4 + 4 ones in total.</i>  <math>4 + 4 = 8</math>  <math>214 + 4 = 218</math> </p>	<p>Use number bonds to add the 1s.</p>  <p> <math>245 + 4</math>  <math>5 + 4 = 9</math>  <math>245 + 4 = 249</math> </p>	<p>Understand the link with counting on.</p> <p> <math>245 + 4</math> </p>  <p>Use number bonds to add the 1s and understand that this is more efficient and less prone to error.</p> <p> <math>245 + 4 = ?</math>  <i>I will add the 1s.</i>  <math>5 + 4 = 9</math>          So, <math>245 + 4 = 249</math> </p>

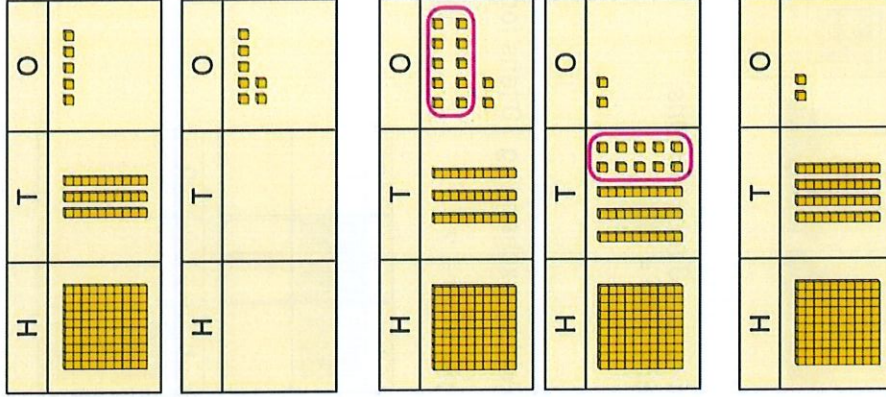

**3-digit number + 1s with exchange**

Understand that when the 1s sum to 10 or more, this requires an exchange of 10 ones for 1 ten.

Children should explore this using unitted objects or physical apparatus.

Exchange 10 ones for 1 ten where needed. Use a place value grid to support the understanding.

$135 + 7 = 142$

Understand how to bridge by partitioning to the 1s to make the next 10.

$135 + 7 = ?$

$135 + 5 + 2 = 142$

Ensure that children understand how to add 1s bridging a 100.

$198 + 5 = ?$

$198 + 2 + 3 = 203$

<p><b>3-digit number + 10s, no exchange</b></p>	<p>Calculate mentally by forming the number bond for the 10s.</p>  <p><math>234 + 50</math>  <i>There are 3 tens and 5 tens altogether.</i>  <math>3 + 5 = 8</math>  <i>In total there are 8 tens.</i>  <math>234 + 50 = 284</math></p>	<p>Calculate mentally by forming the number bond for the 10s.</p> <p><math>351 + 30 = ?</math></p>  <p><math>5 \text{ tens} + 3 \text{ tens} = 8 \text{ tens}</math>  <math>351 + 30 = 381</math></p>	<p>Calculate mentally by forming the number bond for the 10s.</p> <p><math>753 + 40</math></p> <p><i>I know that <math>5 + 4 = 9</math></i></p> <p>So, <math>50 + 40 = 90</math>  <math>753 + 40 = 793</math></p>
<p><b>3-digit number + 10s, with exchange</b></p>	<p>Understand the exchange of 10 tens for 1 hundred.</p>  <p><math>184 + 20 = ?</math></p>	<p>Add by exchanging 10 tens for 1 hundred.</p> <p><math>184 + 20 = ?</math></p>  <p><math>184 + 20 = 204</math></p>	<p>Understand how the addition relates to counting on in 10s across 100.</p>  <p><math>184 + 20 = ?</math></p> <p><i>I can count in 10s ... 194 ... 204</i>  <math>184 + 20 = 204</math></p> <p>Use number bonds within 20 to support efficient mental calculations.</p> <p><math>385 + 50</math>  <i>There are 8 tens and 5 tens.</i>  <i>That is 13 tens.</i>  <math>385 + 50 = 300 + 130 + 5</math>  <math>385 + 50 = 435</math></p>

<p><b>3-digit number + 2-digit number</b></p>	<p>Use place value equipment to make and combine groups to model addition.</p>	<p>Use a place value grid to organise thinking and adding of 1s, then 10s.</p>	<p>Use the vertical column method to represent the addition. Children must understand how this relates to place value at each stage of the calculation.</p>
<p><b>3-digit number + 2-digit number, exchange required</b></p> <p>Use place value equipment to model addition and understand where exchange is required.</p> <p>Use place value counters to represent <math>154 + 72</math>.</p> <p>Use this to decide if any exchange is required.</p> <p>There are 5 tens and 7 tens. That is 12 tens so 1 will exchange.</p>	<p>Represent the required exchange on a place value grid using equipment.</p> <p><math>275 + 16 = ?</math></p> <p><math>275 + 16 = 291</math></p> <p>Note: In this example, a mental method may be more efficient. The numbers for the example calculation have been chosen to allow children to visualise the concept and see how the method relates to place value. Children should be encouraged at every stage to select methods that are accurate and efficient.</p>	<p>Use a column method with exchange. Children must understand how the method relates to place value at each stage of the calculation.</p> <p><math>275 + 16 = 291</math></p>	

<p><b>3-digit number + 3-digit number, no exchange</b></p>	<p>Use place value equipment to make a representation of a calculation. This may or may not be structured in a place value grid.</p> <p><math>326 + 541</math> is represented as:</p>	<p>Represent the place value grid with equipment to model the stages of column addition.</p>	<p>Use a column method to solve efficiently, using known bonds. Children must understand how this relates to place value at every stage of the calculation.</p>
<p><b>3-digit number + 3-digit number, exchange required</b></p> <p>There are 13 ones. I will exchange 10 ones for 1 ten.</p>	<p>Use place value equipment to enact the exchange required.</p>	<p>Model the stages of column addition using place value equipment on a place value grid.</p>	<p>Use column addition, ensuring understanding of place value at every stage of the calculation.</p> <p><math>126 + 217 = 343</math></p> <p>Note: Children should also study examples where exchange is required in more than one column, for example <math>185 + 318 = ?</math></p>

<p><b>Representing addition problems, and selecting appropriate methods</b></p>	<p>Encourage children to use their own drawings and choices of place value equipment to represent problems with one or more steps.</p> <p>These representations will help them to select appropriate methods.</p>	<p>Children understand and create bar models to represent addition problems.</p> <p><math>275 + 99 = ?</math></p>  <p><math>275 + 99 = 374</math></p>	<p>Use representations to support choices of appropriate methods.</p>  <p><i>I will add 100, then subtract 1 to find the solution.</i></p> <p><math>128 + 105 + 83 = ?</math></p> <p><i>I need to add three numbers.</i></p> <p><math>128 + 105 = 233</math></p>   <p><b>Vocabulary</b></p> <p>add, more, plus, and, make, altogether, total, equal to, equals, double, most, count on, number line, digit, sum, tens, units, partition, plus, addition, column, tens boundary, hundreds, hundreds boundary, increase, vertical, expanded, compact, columnar,</p>
<p><b>Year 3 Subtraction</b></p>			
<p><b>Subtracting 100s</b></p>	<p>Use known facts and unitising to subtract multiples of 100.</p>	<p>Use known facts and unitising to subtract multiples of 100.</p>	<p>Understand the link with counting back in 100s.</p>

	<p>5 - 2 = 3 500 - 200 = 300</p>	<p>4 - 2 = 2 400 - 200 = 200</p>	<p>400 - 200 = 200</p> <p>Use known facts and unitising as efficient and accurate methods. <i>I know that 7 - 4 = 3. Therefore, I know that 700 - 400 = 300.</i></p>

**Multiplying a 2-digit number by a 1-digit number**

Understand how to link partitioning a 2-digit number with multiplying.

Each person has 23 flowers.

Each person has 2 tens and 3 ones.

There are 3 groups of 2 tens.

There are 3 groups of 3 ones.

Use place value equipment to model the multiplication context.

There are 3 groups of 3 ones.

There are 3 groups of 2 tens.

Use place value to support how partitioning is linked with multiplying by a 2-digit number.

$$3 \times 24 = ?$$

$$3 \times 4 = 12$$

$$3 \times 20 = 60$$

$$60 + 12 = 72$$

$$3 \times 24 = 72$$

Use addition to complete multiplications of 2-digit numbers by a 1-digit number.

$$4 \times 13 = ?$$

$$4 \times 3 = 12$$

$$12 + 40 = 52$$

$$4 \times 13 = 52$$

$$4 \times 10 = 40$$

**Multiplying a 2-digit number by a 1-digit number, expanded column method**

Use place value equipment to model how 10 ones are exchanged for a 10 in some multiplications.

$3 \times 24 = ?$

$3 \times 20 = 60$

$3 \times 4 = 12$

$3 \times 24 = 60 + 12$

$3 \times 24 = 70 + 2$

$3 \times 24 = 72$

Understand that multiplications may require an exchange of 1s for 10s, and also 10s for 100s.

$4 \times 23 = ?$

$4 \times 23 = 92$

$5 \times 23 = ?$

$5 \times 3 = 15$

$5 \times 20 = 100$

$5 \times 23 = 115$

Children may write calculations in expanded column form, but must understand the link with place value and exchange.

Children are encouraged to write the expanded parts of the calculation separately.

$5 \times 28 = ?$

**Representing subtractions and checking strategies**

Use bar models to represent subtractions where a part needs to be calculated.

I can work out the total number of Yes votes using  $5,762 - 2,899$ .

Bar models can also represent 'find the difference' as a subtraction problem.

**Vocabulary** equal to, take, take away, less, minus, subtract, leaves, distance between, difference between, how many more, how many fewer / less than, most, least, count back, how many left, how much less is \_\_?, count on, strategy, partition, tens, units, inverse, exchange, decrease.

Use inverse operations to check subtractions.

I calculated  $1,225 - 799 = 574$ .

I will check by adding the parts.

1,225

The parts do not add to make 1,225. I must have made a mistake.

<p><b>Year 4 Multiplication</b></p>	<p>Use unitising and place value equipment to understand how to multiply by multiples of 1, 10 and 100.</p>  <p>3 groups of 4 ones is 12 ones. 3 groups of 4 tens is 12 tens. 3 groups of 4 hundreds is 12 hundreds.</p>	<p>Use unitising and place value equipment to understand how to multiply by multiples of 1, 10 and 100.</p>  <p><math>3 \times 4 = 12</math> <math>3 \times 40 = 120</math> <math>3 \times 400 = 1,200</math></p>	<p>Use known facts and understanding of place value and commutativity to multiply mentally.</p> <p><math>4 \times 7 = 28</math> <math>4 \times 70 = 280</math> <math>40 \times 7 = 280</math> <math>4 \times 700 = 2,800</math> <math>400 \times 7 = 2,800</math></p>
<p><b>Understanding times-tables up to <math>12 \times 12</math></b></p>	<p>Understand the special cases of multiplying by 1 and 0.</p>  <p><math>5 \times 1 = 5</math></p>  <p><math>5 \times 0 = 0</math></p>	<p>Represent the relationship between the x9 table and the x10 table.</p>  <p>Represent the x11 table and x12 tables in relation to the x10 table.</p>  <p><math>2 \times 11 = 20 + 2</math> <math>3 \times 11 = 30 + 3</math> <math>4 \times 11 = 40 + 4</math></p>  <p><math>4 \times 12 = 40 + 8</math></p>	<p>Understand how times-tables relate to counting patterns.</p> <p>Understand links between the x3 table, x6 table and x9 table <i>5 x 6 is double 5 x 3</i></p> <p>x5 table and x6 table <i>I know that <math>7 \times 5 = 35</math> so I know that <math>7 \times 6 = 35 + 7</math>.</i></p> <p>x5 table and x7 table <math>3 \times 7 = 3 \times 5 + 3 \times 2</math></p>  <p>x9 table and x10 table <math>6 \times 10 = 60</math> <math>6 \times 9 = 60 - 6</math></p>

<p><b>Understanding and using partitioning in multiplication</b></p>	<p>Make multiplications by partitioning.</p> <p><i>4 × 12 is 4 groups of 10 and 4 groups of 2.</i></p>  <p><math>4 \times 12 = 40 + 8</math></p>	<p>Understand how multiplication and partitioning are related through addition.</p>  <p><math>4 \times 3 = 12</math>    <math>4 \times 5 = 20</math></p> <p><math>4 \times 3 = 12</math></p> <p><math>4 \times 5 = 20</math></p> <p><math>12 + 20 = 32</math></p> <p><math>4 \times 8 = 32</math></p>	<p>Use partitioning to multiply 2-digit numbers by a single digit.</p> <p><math>18 \times 6 = ?</math></p>  <p><math>18 \times 6 = 10 \times 6 + 8 \times 6</math></p> <p><math>= 60 + 48</math></p> <p><math>= 108</math></p>
<p><b>Column multiplication for 2- and 3-digit numbers multiplied by a single digit</b></p>	<p>Use place value equipment to make multiplications.</p> <p><i>Make <math>4 \times 136</math> using equipment.</i></p>  <p><i>I can work out how many 1s, 10s and 100s.</i></p> <p><i>There are <math>4 \times 6</math> ones... 24 ones</i></p> <p><i>There are <math>4 \times 3</math> tens ... 12 tens</i></p> <p><i>There are <math>4 \times 1</math> hundreds ... 4 hundreds</i></p> <p><math>24 + 120 + 400 = 544</math></p>	<p>Use place value equipment alongside a column method for multiplication of up to 3-digit numbers by a single digit.</p>  <p><math>312</math></p> <p><math>\times 4</math></p> <hr/> <p><math>128</math></p>	<p>Use the formal column method for up to 3-digit numbers multiplied by a single digit.</p>  <p><math>312</math></p> <p><math>\times 3</math></p> <hr/> <p><math>936</math></p> <p>Understand how the expanded column method is related to the formal column method and understand how any exchanges are related to place value at each stage of the calculation.</p>  <p><math>235</math></p> <p><math>\times 2</math></p> <hr/> <p><math>470</math></p>

<p><b>Multiplying more than two numbers</b></p>	<p>Represent situations by multiplying three numbers together.</p>  <p>Each sheet has <math>2 \times 5</math> stickers. There are 3 sheets.</p> <p>There are <math>5 \times 2 \times 3</math> stickers in total.</p> $5 \times 2 \times 3 = 30$ $10 \times 3 = 30$	<p>Understand that commutativity can be used to multiply in different orders.</p>  $2 \times 6 \times 10 = 120$ $12 \times 10 = 120$ $10 \times 6 \times 2 = 120$ $60 \times 2 = 120$	<p>Use knowledge of factors to simplify some multiplications.</p> $24 \times 5 = 12 \times 2 \times 5$ $12 \times 2 \times 5 =$  $12 \times 10 = 120$ <p>So, <math>24 \times 5 = 120</math></p> <p><b>Vocabulary</b> groups of, lots of, times, array, altogether, multiply, count, multiplied by, repeated addition, column, row, sets of, equal groups, times as big as, once, twice, three times, inverse, partition, grid method, multiple,</p>
<p><b>Year 4 Division</b></p> <p><b>Understanding the relationship between multiplication and division, including times-tables</b></p>	<p>Use objects to explore families of multiplication and division facts.</p>  $4 \times 6 = 24$ <p>24 is 6 groups of 4. 24 is 4 groups of 6.</p> <p>24 divided by 6 is 4. 24 divided by 4 is 6.</p>	<p>Represent divisions using an array.</p>  $28 \div 7 = 4$	<p>Understand families of related multiplication and division facts.</p> <p>I know that <math>5 \times 7 = 35</math></p> <p>so I know all these facts:</p> $5 \times 7 = 35$ $7 \times 5 = 35$ $35 = 5 \times 7$ $35 = 7 \times 5$ $35 \div 5 = 7$ $35 \div 7 = 5$ $7 = 35 \div 5$ $5 = 35 \div 7$

<p><b>Dividing multiples of 10 and 100 by a single digit</b></p>	<p>Use place value equipment to understand how to use unitising to divide.</p>  <p>8 ones divided into 2 equal groups 4 ones in each group</p> <p>8 tens divided into 2 equal groups 4 tens in each group</p> <p>8 hundreds divided into 2 equal groups 4 hundreds in each group</p>	<p>Represent divisions using place value equipment.</p>  <p><math>9 \div 3 = \square</math></p> <p><math>90 \div 3 = \square</math></p> <p><math>900 \div 3 = \square</math></p> <p><math>9 \div 3 = 3</math></p> <p>9 tens divided by 3 is 3 tens.</p> <p>9 hundreds divided by 3 is 3 hundreds.</p>	<p>Use known facts to divide 10s and 100s by a single digit.</p> <p><math>15 \div 3 = 5</math></p> <p><math>150 \div 3 = 50</math></p> <p><math>1500 \div 3 = 500</math></p>
<p><b>Dividing 2-digit and 3-digit numbers by a single digit by partitioning into 100s, 10s and 1s</b></p>	<p>Partition into 10s and 1s to divide where appropriate.</p> <p><math>39 \div 3 = ?</math></p>  <p><math>3 \times 10 = 30</math></p> <p><math>3 \times 3 = 9</math></p> <p><math>39 = 30 + 9</math></p> <p><math>30 \div 3 = 10</math></p> <p><math>9 \div 3 = 3</math></p> <p><math>39 \div 3 = 13</math></p>	<p>Partition into 100s, 10s and 1s using Base 10 equipment to divide where appropriate.</p> <p><math>39 \div 3 = ?</math></p>  <p>3 groups of 1 ten    3 groups of 3 ones</p> <p><math>39 = 30 + 9</math></p> <p><math>30 \div 3 = 10</math></p> <p><math>9 \div 3 = 3</math></p> <p><math>39 \div 3 = 13</math></p>	<p>Partition into 100s, 10s and 1s using a part-whole model to divide where appropriate.</p> <p><math>142 \div 2 = ?</math></p>  <p><math>100 \div 2 = \square</math>    <math>40 \div 2 = \square</math>    <math>6 \div 2 = \square</math></p> <p><math>100 \div 2 = 50</math></p> <p><math>40 \div 2 = 20</math></p> <p><math>6 \div 2 = 3</math></p> <p><math>50 + 20 + 3 = 73</math></p> <p><math>142 \div 2 = 73</math></p>

<p><b>Dividing 2-digit and 3-digit numbers by a single digit, using flexible partitioning</b></p>	<p>Use place value equipment to explore why different partitions are needed.</p> <p><math>42 \div 3 = ?</math></p> <p><i>I will split it into 30 and 12, so that I can divide by 3 more easily.</i></p>	<p>Represent how to partition flexibly where needed.</p> <p><math>84 \div 7 = ?</math></p> <p><i>I will partition into 70 and 14 because I am dividing by 7.</i></p> <p><math>70 \div 7 = 10</math>   <math>14 \div 7 = 2</math></p> <p><math>84 \div 7 = 12</math></p>	<p>Make decisions about appropriate partitioning based on the division required.</p> <p>Understand that different partitions can be used to complete the same division.</p>
<p><b>Understanding remainders</b></p>	<p>Use place value equipment to find remainders.</p> <p><i>85 shared into 4 equal groups</i></p> <p><i>There are 24, and 1 that cannot be shared.</i></p>	<p>Represent the remainder as the part that cannot be shared equally.</p> <p><math>72 \div 5 = 14</math> remainder 2</p>	<p>Understand how partitioning can reveal remainders of divisions.</p> <p><math>80 \div 4 = 20</math> <math>12 \div 4 = 3</math></p> <p><math>95 \div 4 = 23</math> remainder 3</p>

			<p><b><u>Vocabulary</u></b></p> <p>share, share equally, one each, two each..., group, groups of, lots of, array, divide, divided by, divided into, division, grouping, number line, left, left over, inverse, short division, remainder, multiple, divisible by, factor</p>

**Power Maths calculation policy, UPPER KS2**

## KEY STAGE 2

In upper Key Stage 2, children build on secure foundations in calculation, and develop fluency, accuracy and flexibility in their approach to the four operations. They work with whole numbers and adapt their skills to work with decimals, and they continue to develop their ability to select appropriate, accurate and efficient operations.

**Key language:** decimal, column methods, exchange, partition, mental method, ten thousand, hundred thousand, million, factor, multiple, prime number, square number, cube number

**Addition and subtraction:** Children build on their column methods to add and subtract numbers with up to seven digits, and they adapt the methods to calculate efficiently and effectively with decimals, ensuring understanding of place value at every stage.  
Children compare and contrast methods, and they select mental methods or jottings where appropriate and where these are more likely to be efficient or accurate when compared with formal column methods.  
Bar models are used to represent the calculations required to solve problems and may indicate where efficient methods can be chosen.

**Multiplication and division:** Building on their understanding, children develop methods to multiply up to 4-digit numbers by single-digit and 2-digit numbers.  
Children develop column methods with an understanding of place value, and they continue to use the key skill of unitising to multiply and divide by 10, 100 and 1,000.  
Written division methods are introduced and adapted for division by single-digit and 2-digit numbers and are understood alongside the area model and place value. In Year 6, children develop a secure understanding of how division is related to fractions.  
Multiplication and division of decimals are also introduced and refined in Year 6.

**Fractions:** Children find fractions of amounts, multiply a fraction by a whole number and by another fraction, divide a fraction by a whole number, and add and subtract fractions with different denominators. Children become more confident working with improper fractions and mixed numbers and can calculate with them.  
Understanding of decimals with up to 3 decimal places is built through place value and as fractions, and children calculate with decimals in the context of measure as well as in pure arithmetic.  
Children develop an understanding of percentages in relation to hundredths, and they understand how to work with common percentages: 50%, 25%, 10% and 1%.

Year 5

	Concrete	Pictorial	Abstract
Year 5 Addition			
Column addition with whole numbers	<p>Use place value equipment to represent additions.</p> <p>Add a row of counters onto the place value grid to show <math>15,735 + 4,012</math>.</p>	<p>Represent additions, using place value equipment on a place value grid alongside written methods.</p> <p><i>I need to exchange 10 tens for a 100.</i></p> $\begin{array}{r} \text{TTh} \text{ Th} \text{ H} \text{ T} \text{ O} \\ 2 \ 0 \ 1 \ 5 \ 3 \\ + 1 \ 4 \ 0 \ 1 \ 2 \\ \hline 3 \ 4 \ 5 \ 6 \ 5 \end{array}$	<p>Use column addition, including exchanges.</p> $\begin{array}{r} \text{TTh} \text{ Th} \text{ H} \text{ T} \text{ O} \\ 1 \ 9 \ 1 \ 7 \ 5 \\ + 1 \ 8 \ 4 \ 1 \ 2 \\ \hline 3 \ 7 \ 5 \ 9 \ 2 \end{array}$
Representing additions		<p>Bar models represent addition of two or more numbers in the context of problem solving.</p> <p>Jen: £2,600 Holly: £2,600 Total: £4,050</p> $\begin{array}{r} \text{Th} \text{ H} \text{ T} \text{ O} \\ 2 \ 6 \ 0 \ 0 \\ + 1 \ 4 \ 5 \ 0 \\ \hline 4 \ 0 \ 5 \ 0 \end{array}$ $\begin{array}{r} \text{Th} \text{ H} \text{ T} \text{ O} \\ 2 \ 6 \ 0 \ 0 \\ + 4 \ 0 \ 5 \ 0 \\ \hline 6 \ 6 \ 5 \ 0 \end{array}$	<p>Use approximation to check whether answers are reasonable.</p> $\begin{array}{r} \text{TTh} \text{ Th} \text{ H} \text{ T} \text{ O} \\ 2 \ 3 \ 4 \ 0 \ 5 \\ + 7 \ 8 \ 9 \ 2 \\ \hline 2 \ 0 \ 2 \ 9 \ 7 \end{array}$ <p><i>I will use <math>23,000 + 8,000</math> to check.</i></p> $\begin{array}{r} \text{TTh} \text{ Th} \text{ H} \text{ T} \text{ O} \\ 2 \ 3 \ 4 \ 0 \ 5 \\ + 7 \ 8 \ 9 \ 2 \\ \hline 3 \ 1 \ 2 \ 9 \ 7 \end{array}$

<p><b>Adding tenths</b></p>	<p>Link measure with addition of decimals. Two lengths of fencing are 0.6 m and 0.2 m. How long are they when added together?</p> 	<p>Use a bar model with a number line to add tenths.</p>  <p><math>0.6 + 0.2 = 0.8</math> 6 tenths + 2 tenths = 8 tenths</p>	<p>Understand the link with adding fractions.</p> $\frac{6}{10} + \frac{2}{10} = \frac{8}{10}$ <p>6 tenths + 2 tenths = 8 tenths <math>0.6 + 0.2 = 0.8</math></p>
<p><b>Adding decimals using column addition</b></p>	<p>Use place value equipment to represent additions. Show <math>0.23 + 0.45</math> using place value counters.</p>	<p>Use place value equipment on a place value grid to represent additions. Represent exchange where necessary.</p>  <p>Include examples where the numbers of decimal places are different.</p> 	<p>Add using a column method, ensuring that children understand the link with place value.</p> $\begin{array}{r} \text{O} \cdot \text{Tth} \text{Hth} \\ 0 \cdot 2 \quad 3 \\ + 0 \cdot 4 \quad 5 \\ \hline 0 \cdot 6 \quad 8 \end{array}$ <p>Include exchange where required, alongside an understanding of place value.</p> $\begin{array}{r} \text{O} \cdot \text{Tth} \text{Hth} \\ 0 \cdot 9 \quad 2 \\ + 0 \cdot 3 \quad 3 \\ \hline 1 \cdot 2 \quad 5 \end{array}$ <p>Include additions where the numbers of decimal places are different.</p> $3.4 + 0.65 = ?$ $\begin{array}{r} \text{O} \cdot \text{Tth} \text{Hth} \\ 3 \cdot 4 \quad 0 \\ + 0 \cdot 6 \quad 5 \\ \hline \end{array}$

			<p><b>Vocabulary</b></p> <p>add, more, plus, and, make, altogether, total, equal to, equals, double, most, count on, number line, digit, sum, tens, units, partition, plus, addition, column, tens boundary, hundreds, hundreds boundary, increase, vertical, expanded, compact, columnar, exchange, inverse, thousands, decimal places, decimal point, tenths,</p>
<p><b>Year 5 Subtraction</b></p>	<p>Use place value equipment to understand where exchanges are required.</p> <p><math>2,250 - 1,070</math></p>	<p>Represent the stages of the calculation using place value equipment on a grid alongside the calculation, including exchanges where required.</p> <p><math>15,735 - 2,582 = 13,153</math></p> <p>Now subtract the 10s. Exchange 1 hundred for 10 tens.</p> <p>Subtract the 100s, 1,000s and 10,000s.</p>	<p>Use column subtraction methods with exchange where required.</p> $\begin{array}{r} \text{TTh Th H T O} \\ 58 \cancel{1} 2 \quad 10 \quad 9 \quad 7 \\ - 1 \quad 8 \quad 5 \quad 3 \quad 4 \\ \hline 4 \quad 3 \quad 5 \quad 6 \quad 3 \end{array}$ <p><math>62,097 - 18,534 = 43,563</math></p>
<p><b>Checking strategies and</b></p>		<p>Bar models represent subtractions in problem contexts, including 'find the difference'.</p>	<p>Children can explain the mistake made when the columns have not been ordered correctly.</p>

<p><b>representing subtractions</b></p>	<p>Athletics Stadium: <input type="text"/> → 75,450</p> <p>Hockey Centre: <input type="text"/> ← 42,300</p> <p>Velodrome: 15,735 ← <input type="text"/> → ?</p>	<p><b>Belle's working</b></p> <table border="0"> <tr><td>T</td><td>H</td><td>H</td><td>T</td><td>O</td></tr> <tr><td>1</td><td>7</td><td>8</td><td>7</td><td>7</td></tr> <tr><td>+</td><td>4</td><td>0</td><td>1</td><td>2</td></tr> <tr><td colspan="5"><hr/></td></tr> <tr><td>5</td><td>7</td><td>9</td><td>9</td><td>7</td></tr> </table> <p><b>Correct method</b></p> <table border="0"> <tr><td>T</td><td>H</td><td>H</td><td>T</td><td>O</td></tr> <tr><td>1</td><td>7</td><td>8</td><td>7</td><td>7</td></tr> <tr><td>+</td><td>4</td><td>0</td><td>1</td><td>2</td></tr> <tr><td colspan="5"><hr/></td></tr> <tr><td>2</td><td>1</td><td>8</td><td>8</td><td>9</td></tr> </table> <p>Use approximation to check calculations.</p> <p>I calculated <math>18,000 + 4,000</math> mentally to check my subtraction.</p>	T	H	H	T	O	1	7	8	7	7	+	4	0	1	2	<hr/>					5	7	9	9	7	T	H	H	T	O	1	7	8	7	7	+	4	0	1	2	<hr/>					2	1	8	8	9

$143 \times 12 = 1,716$   
 There are 1,716 boxes of cereal in total.  
 $143 \times 12 = 1,716$

Use column multiplication, ensuring understanding of place value at each stage.

$$\begin{array}{r} 143 \\ \times 12 \\ \hline 286 \\ 1430 \\ \hline 1716 \end{array}$$

Progress to include examples that require multiple exchanges as understanding, confidence and fluency build.

$1,274 \times 32 = ?$   
 First multiply 1,274 by 2.

$$\begin{array}{r} 1274 \\ \times 32 \\ \hline 2548 \\ \hline 1274 \times 2 \end{array}$$

Then multiply 1,274 by 30.

$$\begin{array}{r} 1274 \\ \times 30 \\ \hline 2548 \\ \hline 38220 \\ \hline 1274 \times 30 \end{array}$$

Finally, find the total.

			<p> <math display="block">\begin{array}{r} 1274 \\ \times 32 \\ \hline 2548 \\ 38220 \\ \hline 40768 \\ \hline \end{array}</math> <math display="block">\begin{array}{r} 1274 \\ \times 32 \\ \hline 1,274 \times 2 \\ 1,274 \times 30 \\ \hline 1,274 \times 32 \end{array}</math> <math display="block">\begin{array}{r} 1,274 \\ \times 32 \\ \hline 1,274 \times 2 \\ 1,274 \times 30 \\ \hline 1,274 \times 32 \end{array}</math> </p>

 $0.02 \times 3$

			<p><b>Vocabulary</b></p> <p>groups of, lots of, times, array, altogether, multiply, count, multiplied by, repeated addition, column, row, sets of, equal groups, times as big as, once, twice, three times, inverse, partition, grid method, multiple, product tens units value decimal</p>
<p><b>Year 6 Division</b></p>			<p>Recognise and know primes up to 100. Understand that 2 is the only even prime, and that 1 is not a prime number.</p>
<p><b>Understanding factors</b></p>	<p>Use equipment to explore different factors of a number.</p>	<p>Recognise prime numbers as numbers having exactly two factors. Understand the link with division and remainders.</p>	<p>Use short division to divide by a single digit.</p>
<p><b>Dividing by a single digit</b></p>	<p>Use equipment to make groups from a total.</p>		

			<p> <math display="block">\begin{array}{r} 0 \\ 6 \overline{) 132} \\ \underline{0} \phantom{2} \\ 0 \phantom{2} \\ 6 \overline{) 132} \\ \underline{0} \phantom{2} \\ 0 \phantom{2} \\ 6 \overline{) 132} \\ \underline{0} \phantom{2} \\ 0 \phantom{2} \\ 6 \overline{) 132} \\ \underline{0} \phantom{2} \\ 0 \phantom{2} \end{array}</math> <p>Use an area model to link multiplication and division.</p> <p> <math>132 = 120 + 12</math>  <math>132 \div 6 = 20 + 2 = 22</math> </p> </p>
<p><b>Dividing by a 2-digit number using factors</b></p>	<p>Understand that division by factors can be used when dividing by a number that is not prime.</p>	<p>Use factors and repeated division. appropriate.</p> <p><math>2,100 \div 12 = ?</math></p>	<p>Use factors and repeated division where appropriate.</p> <p><math>2,100 \div 12 = ?</math></p>
<p><b>Dividing by a 2-digit number using long division</b></p>	<p>Use equipment to build numbers from groups.</p>	<p>Use an area model alongside written division to model the process.</p> <p><math>377 \div 13 = ?</math></p>	<p>Use long division where factors are not useful (for example, when dividing by a 2-digit prime number). Write the required multiples to support the division process.</p>

182 divided into groups of 13.  
There are 14 groups.

$$377 \div 13 = 29$$

$$377 \div 13 = ?$$

$$377 \div 13 = 29$$

A slightly different layout may be used, with the division completed above rather than at the side.

Divisions with a remainder explored in problem-solving contexts.

**Dividing by 10, 100 and 1,000**

Use place value equipment to explore division as exchange.

0.2 is 2 tenths.  
 2 tenths is equivalent to 20 hundredths.  
 20 hundredths divided by 10 is 2 hundredths.

Represent division to show the relationship with multiplication. Understand the effect of dividing by 10, 100 and 1,000 on the digits on a place value grid.

Understand how to divide using division by 10, 100 and 1,000.

Use knowledge of factors to divide by multiples of 10, 100 and 1,000.

$40 \div 5 = 8$   
 $8 \div 10 = 0.8$   
 So,  $40 \div 50 = 0.8$

**Dividing decimals**

Use place value equipment to explore division of decimals.

8 tenths divided into 4 groups. 2 tenths in each group.

Use a bar model to represent divisions.

Use short division to divide decimals with up to 2 decimal places.

**Vocabulary**

share, share equally, one each, two each...,  
group, groups of, lots of, array, divide, divided  
by, divided into, division, grouping, number  
line, left, left over, inverse, short division,  
remainder, multiple, divisible by, factor,  
dividend, quotient, divisor, decimal, fraction,  
decimal point tenths hundredths
