

Knowledge Organiser - OS Map skills and Fieldwork

Subject Specific Vocabulary
OS map
ordnance
survey
human features
physical features
landscape
location
scale
small-scale
large-scale
fieldwork
symbols
compass
observation

Key Knowledge
- Know how to identify physical features and human features on maps.
- Understand the difference between small-scale and large-scale maps and how scale affects the level of detail.
- Use compass points and intercardinal points to describe locations.
- Observe and explore local areas through fieldwork, identifying and matching features to map symbols.
- Compare different locations using maps and describe similarities and differences in physical and human features.

Learning Objectives
To know what an OS map is.
To know how scale changes the way we describe a place.
To identify physical and human features at Boggart Hole Clough and describe their location using compass directions.
To know what the area is like just beyond my school.
To know what an area is like beyond my region.
